Project Value: £130,000

Scope of Services:

Interior Design
Fit-out Contractor
Furniture Supplier
Principal Designer
Move Management

Project Team:

Eleanor Howe
Graeme Wilson
Graeme Syme

Space Solutions recently completed the refurbishment of Innovation House on Dundee's Technology Park for Insights, a leading provider of learning and development solutions for business. Insights' brief was to accommodate 65 staff including creative, technology and sales teams in a collaborative environment which was tailored to their colourful, creative culture.

The project scope included optimising the layout by relocating glass partitions to form bright, open-plan offices, with new meeting rooms and "phone booths" for sales staff. A new social space with the atmosphere of an urban café acts as a break-out area, lunch room and somewhere for staff to gather and relax on Friday afternoons. As well as borrowing a palette of bright colours from Insights' branding, the client's own designers inspired graphics used throughout the building.

Insights' timescale called for a fast turnaround: design took around two months and construction another two months, and the overall project cost was around £130k.
